DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 4/28/03 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 33-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller et al (4,292,512). Miller et al discloses the claimed invention. Note figure 3 which

4. Claims 42-45 are rejected under 35 U.S.C. 102(e) as being anticipated by Joyce (6,278,721 B1). Joyce discloses the claimed invention. Note figures 1 and 2, for the monitor photodiode (135), the laser diode (110, 155), and the fiber (120, 140) having a

fiber grating (170).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 40-41, 46-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller et al. Miller et al has been discussed above except for a substrate and fiber grating. Examiner asserts that these are well-known in laser modules for providing heat sink and minimizing wavelength locking range variability. It would have been obvious to one of ordinary skill in the art to modify Miller et al by employing a substrate and fiber grating, as are well-known, for the advantageous benefits of providing heat sink and minimizing wavelength locking range variability.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quyen P. Leung whose telephone number is (703) 308-0545. The examiner can normally be reached on 8:30-5:00, M-F.
